DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, Species I (Claim 1) in the reply filed on 07/11/2006 is acknowledged.
2. Claims 2 – 5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group/Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 07/11/2006.

Information Disclosure Statement

3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

Art Unit: 3663

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hiyoshi et al. (JP02002-21519).

With respect to claim 1:

Hiyoshi et al. (Abstract, Figures, claims) discloses: A method of working a recessed portion in a headrest stay which is provided in a stay portion of said headrest stay formed of a pipe, comprising the steps of: preforming a recess by pressing against said stay portion an outer peripheral portion of a first punch roller for preforming having a rounded portion on the outer peripheral portion in a side view; and directing toward and pressing against said recess an outer peripheral portion of a second

punch roller on the outer periphery portion of which a punch portion for final forming has been formed, so as to form a recessed portion.

While patent drawings are not drawn to scale, relationships clearly shown in the drawings of a reference patent cannot be disregarded in determining the patentability of claims. See In re Mraz, 59 CCPA 866, 455 F.2d 1069, 173 USPQ 25 (1972).
